Prof. Adel Abusitta
Polytechnique Montréal
Montréal, Canada

Subject: Application for Funded Master's Position in Cybersecurity & Machine Learning

Dear Prof. Abusitta,

I am writing to express my strong interest in joining your research group as a Master's student at Polytechnique Montréal. With a solid foundation in full-stack development, data analysis, and a growing specialization in artificial intelligence applications, I am eager to apply my technical skills to the advancement of cybersecurity and machine learning.

During my studies in Management Information Systems at Esprit School of Business, I developed robust skills in Python, JavaScript, database management, and AI integration, reinforced by practical projects in secure web application design and interactive data visualization. My recent work at Digital Move Up involved building a secure full-stack application with AI chatbot integration and role-based authentication, experiences that have deepened my interest in both security architectures and intelligent systems.

I am particularly motivated by your research focus on applied cybersecurity and advanced ML techniques, and I am confident that my blend of technical expertise, problem-solving skills, and enthusiasm for innovation aligns with the goals of your team.

I would be honored to contribute to impactful research while furthering my academic and professional growth under your supervision. Please find my CV and academic transcript attached for your consideration.

Thank you for your time and attention. I look forward to the opportunity to discuss my application further.

Sincerely,

Dhia Amri
